

As a U.S. citizen I believe we all should have a fair say in our democratic process, but it is all too clear that Sinclair has gone too far. Not only are they not giving local affiliates a say in the matter, they are using public air waves to do so.

This is wrong.

I am all too aware that the FCC has been consistently weakening the regulations (as big business -i.e. Clear Channel- wants it) and I do not agree with this issue either. The air waves must remain public and they must not be influenced by monopolies.

Please help us with this problem.
Defend democracy.
